#### **DETAILED ACTION**

#### Election/Restrictions

- 1. Applicant's election without traverse of Species III in Paper No. 6 is acknowledged.
- 2. Claims 4, and 14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

  Election was made without traverse in Paper No. 6.

# Information Disclosure Statement

3. The information disclosure statement filed January 18, 2002 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

## Claim Objections

4. Claim 10 includes the following informalities: in line 8, "a" should be changed to --an--.

Appropriate correction is required.

### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

Art Unit: 3727

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Derosier.

Derosier discloses a strap assembly comprising:

- A waist strap (13, 14, 15) including first and second ends;
- Fasteners (16, 17) attached to the first and second ends;
- A shoulder strap device (18) including one or more straps adjoined to the waist strap in at least two positions (28, 29); and
- One or more front straps (44, 45) releasably adjoined to the shoulder strap device.

Regarding claim 11, the method of supporting one or more mountable devices on an individual is inherent with the use of the strap assembly of Derosier.

### Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 6, 10, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deroiser.

Derosier discloses the claimed invention except for the first and second ends of the waist strap having hook and loop material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the fasteners (16, 17) of Derosier with hook and loop fasteners since the examiner takes Official Notice of the equivalence of snap buckle

assemblies and hook and loop closures for their use in the fastening art and the selection of any of these known equivalents to fasten the ends of the waist belt would be within the level of ordinary skill in the art.

## Allowable Subject Matter

9. Claims 2, 3, 5, 7-9, 12, 13, 15, and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holter et al., tate, Lyer et al., Brewer, and Masak are cited for strap assemblies.
